

## **Flea Exterminating Preparation Instructions from Slug-A-Bug**

- 1) Take pets for a professional flea bath or to your vet for treatment while your home is being treated.
- 2) Vacuum all floors and upholstered furniture. Empty vacuum cleaner away from the house.  
Do not put in your trash can!
- 3) All storage (shoes, clothes, toys, magazines, etc) up off all floors, including closets and under beds.
- 4) Clean or dispose of all pet bedding.
- 5) Everyone, including pets must be out during treatment and after treatment for at least 2-3 hours.  
The floor surface should be dry before returning. Ventilate upon return.

Fleas may be seen jumping off and on during a 33 day period. These fleas have recently hatched and will die. A service call within 60 days, if needed would be half the original exterminating costs.
